

PETITION TO REVERSE DRILLING EXPANSIONS IN CALIFORNIA

9th June 2019

Fellow Californians,

The world is heating up. Climate change is real. Scientists estimate that global temperatures will rise by 3-5 Degrees C by the year 2022. If we do not do something, and fast, we will witness drastic weather conditions, including droughts, heightened sea levels, and worsened air quality, just to name a few.

Yet, the U.S. government recently announced plans to expand drilling efforts in Central California. As a land that is rife with natural beauty, we cannot afford to stand by and do nothing.

This is a petition for the reversal of the abovementioned policies. Let us come together as one, and with a united voice, proclaim that we will not sacrifice the sanctity of our natural habitats for economic gain.

Yours Truly,

A Concerned Fellow Citizen
